## About IranIMEX

### Maritime; Backbone of Global Trades and the Global Economy

Everybody in the world benefits from shipping, yet few people realize it. We ship food, technology, medicines, and etc. As the world's population continues to grow, particularly in developing countries, low-cost and efficient maritime transport has an essential role to play in growth and sustainable development.

Shipping helps ensure that the benefits of trade and commerce are more evenly spread. No country is entirely self-sufficient, and every country relies on maritime trade to sell what it has and buy what it needs. Much of what we use and consume in our everyday lives either has been or will be transported by sea, in the form of raw materials, components or finished articles
